## Together we get results!

ntb group knows how to optimize your website to make the most of LocalAdLink's geo-targeting technology. We've proven it on our own website and we're ready to do it for you too. Just look at the [www.ntb-group.com](http://www.ntb-group.com) statistics on the other side.

We worked hard to create this winning combination and we hoped for the best results possible. We were confident that our knowledge of internet, optimization, search engines, and 'push' technology would mean increased traffic to our website when applied to LocalAdLink's algorithms. However, no one is more surprised than we are that **our website has increased the number of visitors by around 500%.**

We think it's amazing. More people are finding us and that means more opportunities to do business. **Do you need more business? Do you need to be found?**

If you're not already on the internet you need to be there. **And with LocalAdLink you can get an internet presence without a website.** This is the most inexpensive way to advertise today.
